

AAYUSH RAJPUT

SAFe POPM Certified | Product Owner/Manager | Pune | Open to Remote / Hybrid / Relocate
Senior Consultant | aayushhrajput@gmail.com | +91-7000393919 | <https://linkedin.com/in/aayushhrajput>

PROFESSIONAL SUMMARY

Product Manager with 5+ yrs of experience delivering enterprise-scale digital products across **BFSI, Life Sciences, E-commerce, EdTech, and Manufacturing domains. Expertise in product discovery, roadmap planning, & agile delivery**, complemented by hands-on application of AI tools and agents (Copilot, Claude) for accelerating product research, prototyping, requirement analysis, and decision-making. Proven ability to design AI-assisted workflows, build customized agents, and leverage AI-driven insights to improve productivity, enhance user experience, and drive scalable product outcomes.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions, Pune

32 months (Aug 2023 – Present)

Product Owner (MasterCard – B2B & B2C Cards Domain)

- Product Ownership & Delivery:** Owned end-to-end delivery of multiple product modules by defining product vision, roadmap, and prioritized backlogs, ensuring alignment with business objectives and regulatory requirements.
- Stakeholder Collaboration:** Acted as liaison between business & engineering teams across geographies, ensuring clear requirement translation & faster decision-making. Led sprint planning, backlog grooming, sprint reviews, and retrospectives, consistently achieving **95%+ sprint goal completion**.
- Requirement Management:** Authored detailed **Functional User Stories (FUS)**, **Testing User Stories (TUS)**, acceptance criteria, and NFRs, reducing requirement-related defects by **30%**.
- Quality & Risk Management:** Participated in defect triage calls, resolved functional ambiguities, and partnered with QA teams to improve test coverage and release quality.
- Data & Reporting:** Collaborated with PowerBI teams to map attributes, validate dashboards, & enable accurate reporting for business decision-making.
- Delivery Excellence:** Improved delivery predictability by **streamlining backlog refinement & story estimation practices**, and reduced rework and clarifications through well-defined acceptance criteria & early stakeholder validation.

AI-Augmented Product Management

- Built and customized AI agents in Claude and Microsoft Copilot tailored to product-specific contexts — covering payments domain knowledge, NFR libraries, sprint artifacts, and compliance scenarios — enabling faster prototyping and edge-case exploration during backlog grooming sessions.
- Integrated AI tools (Claude & Copilot) into core PM workflows including requirement drafting, BRD/FRD generation, test scenario analysis, and stakeholder communication — reducing documentation effort by ~40% and improving first-pass quality of user stories and acceptance criteria.
- Fine-tuned custom AI agents with domain-specific prompts and context (B2B/B2C payments, regulatory workflows) to support sprint-level analysis, defect triage summarization, and sprint review preparation — improving team throughput and cutting meeting prep time significantly.
- Used AI-assisted research and competitive benchmarking to inform roadmap decisions, actively explored and adopted multiple AI platforms (Claude Projects, Copilot Studio, ChatGPT) for productivity automation across research, prototyping, analysis, and communication use cases throughout the product lifecycle.

Key Clients:

Mastercard | Product Owner | Prepaid Card Management Platform | B2B/B2C Payments Ecosystem

- Improved customer experience by modernizing legacy workflows, enabling faster adoption across new geographies and banking partners.

Abbott Nutrition | Product Owner | E-commerce & Customer Engagement Platform | Global Health & Nutrition

- Provided leadership with real-time visibility into sales and engagement metrics. Onboarded of 10K+ users across websites within 6 months.

Network Rail | Product Owner | Digital Survey & Order Management System (OMS) | Infrastructure Operations

US Bank | Product Owner | Delivered banking workflows with focus on security, scalability, and customer experience.

Tata Consultancy Services (TCS), Indore - Business Analyst

25 months (July 2019 - August 2021)

- Supported business analysis activities by gathering requirements, documenting functional flows, and coordinating with development teams.
- Assisted in production issue analysis, RCA and resolution, improving system stability and response times.
- Led clarification calls with Dev, QA, Power BI, and Architecture teams to ensure accurate interpretation and delivery of business requirements.
- Enabled faster demos and reviews by coordinating feedback between business and delivery teams. Contributed to adoption of Agile best practices, improving team velocity and transparency.

EDUCATION

Institute of Management Technology Ghaziabad (IMT Ghaziabad)

PGDM/MBA

2021-2023

- Awards: Scholarship – 12th Late Shri Mahendra Nath Ji Memorial Scholarship (Merit-cum-mean basis), 2022

Medi-caps Institute of Management and Technology, Indore

Bachelor of Engineering, Electronics and Communication Engineering

2015-2019

TECHNICAL SKILLS

- Product Management:** Product Discovery, Roadmap Planning, Backlog Prioritization, User Stories, Acceptance Criteria, MVP Definition, Stakeholder Management, Product Metrics, Agile, Scrum, Kanban, SAFe, SDLC. Requirement Gathering, Functional Analysis, Process Mapping.
- Expertise:** Payments, Core Banking, BRD, FRD, PRD, Executive Presentations, Leadership, Communication
- AI & Tools:** ChatGPT, Copilot, Jira, Confluence, MIRO, Figma, Power BI, Azure DevOps, Rally, ALM, M-Files, **Claude, LLMs**
- Certifications:** SAFe 6.0 POPM, Scaled Agile Inc!, 2024, Business Analysis: Functional and NFR, Udemy, 2025
